**CTesports BLAZAR700 80+ GOLD FULL MODULAR PSU**  
**BLAZAR 700**

#### DESCRIPTION

The Blazar700 80+ Gold is a fully modular power supply with two lighting circuits both RGB: one on the ring around the fan and the other on the side with the CTesports logo that is so illuminated. The backlighting can be set with a button on the back of the power supply and it is possible to set 7 different fixed colors and 2 different RGB lighting effects with fade between the various colors.

The Blazar700 is obviously a high-end power supply, every detail has been meticulously designed to satisfy the most demanding users, from the single 12V + output with 58Ampere that provides a full 700watt (696watt) to the wide range of cables including 6 connections for PCI-Express 6 + 2.
