CTesports 12CM RAINBOW LIGHT RING FAN
HYPERON

DESCRIPTION

HYPERON is a new generation 12cm fan, with multicircuit ring with Rainbow light leds and anti-vibration mounts. HYPERON is a multicircuit: it can emit up to 256 colors at the same time or on / off, this means that, driven by a specific controller, it can perform various special effects: fixed light, RGB light, Rainbow light and countless types of animations. The fan is supplied in retail packaging.
